

Project ECHO[®] Management of Opioid Use Disorder Clinic

“Opioids and Benzodiazepines: Risks and Management”

To access this presentation, go to:

<https://razor.med.und.edu/cme/selfserve/web/online-courses>

Presented by

Amy Werremeyer, PharmD, BCPP, North Dakota State University Department of Pharmacy Practice College of Health Professions, Fargo, ND

Christine Harsell, DNP, ANP-BC, Valley Community Health Centers, Grand Forks, ND

Kristen Young, RN, Valley Community Health Centers, Grand Forks, ND

Robin Landwehr, LPCC, Valley Community Health Centers, Grand Forks, ND

Facilitator: David Schmitz, MD

Upon completion of this program, the learner will be able to:

1. Describe the risks associated with concurrent use of benzodiazepines and opioids.
2. Compare and contrast use of buprenorphine and concurrent benzodiazepines vs. other opioids and concurrent benzodiazepines.
3. Describe recent healthcare trends in opioid and benzodiazepine use.
4. List potential strategies to manage a patient with concurrent opioid and benzodiazepine therapy

Who should attend?

All members of the healthcare team to include, but not limited to: physicians, NPs, PAs, nurses, behavioral health providers, social workers, pharmacists, medication assisted treatment (MAT) prescribing providers, and prescribing providers interested in becoming MAT providers.

Why attend? Because you will...

- Participate in case-based clinical discussions focused on the treatment of opioid use disorder.
- Gain up-to-date knowledge of opioid use disorder treatment through brief didactic presentations on topics of interest to learners.
- Improve your confidence in managing patients with opioid use disorder.
