## History:

Reverend W.W.A. Keller, Lutheran Pastor, and the first board of directors sold bonds as the Lutheran Charities Association of Central North Dakota. Gilbert Horton was hired as the design architect. Ground was broken on October 1, 1928.

On Wednesday, October 30, 1929, the cornerstone for the new hospital was laid in place. This was one day after a dramatic drop on Wall Street. Construction was slowed to allow for further fund raising.

Due to the perseverance of Reverend Keller and his board of trustees, some of whom are listed here, Reverend Joseph Johnson, Mr. A. Johnson, Mr. F. G. Koehn, Mr. J.G. Bunge, Reverend Ernst, Mr. E. Frey, Mr. A Foesch, Mr. Ben Gilbertson and Mr. F Koehn, the north wing of the main building opened six years later on September 25, 1935.

## Recreation:

Located in the valley where the James and Pipestem Rivers meet, Jamestown offers a variety of recreational opportunities: from summer activities such as fishing, hunting, and golfing to winter activities such as ice fishing, snowmobiling, and cross country skiing.

Jamestown is also home to The World's Largest Buffalo, the National Buffalo Museum, and the North Dakota Sports Hall of Fame. Jamestown offers something for everyone! Known as the "Pride of the Prairie", Jamestown extends friendly hospitality to all visitors. Whether touring the Frontier Village and viewing our live herd of buffalo, visiting our historical sites, or joining us for a tournament at one of our sporting complexes, we are sure you will enjoy Jamestown. A year-round vacation area, Jamestown also offers a variety of entertainment, excellent motel accommodations, and fine dining to make your visit an unforgettable experience.

## The Future

Vision: Bring four separate provider groups, Jamestown Hospital and the three clinics in town, to one common location.

The three clinics have been invited to co-locate next to the new hospital in a new medical office building. The adjacencies will create greater convenience for patients and medical staff.

The new facility will bring more services and improve recruiting for medical staff and other employees.

## Timing

The groundbreaking is scheduled for Spring 2010 with an opening in Fall 2011.

However, there will be visible activity on the site starting in Fall 2009. Access roads will be built to the site allowing for a more efficient start in 2010.
