## North Dakota Critical Access Hospitals

## History:

Construction on the McVille Community Hospital began in 1916 and was dedicated on Tuesday, February 6, 1917. It was given the name “Community Hospital” because, according to Mr E. C. Olsgaard, then president of the board, emphasized that the institution was not built by McVille alone nor for McVille alone but was given its name because it was built by the entire community and for a community as large as its service can reach. Dr A.O Arneson began practicing as a physician in McVille in 1906. He continued until his death in 1942. Following Dr. Arneson’s death, Dr. Muus began his practice. In 1957 a 6 bed addition was constructed onto the hospital. It was modernized in 1974, the original unit razed, and a replacement built. Nelson County Health Center Care Center was dedicated on July 3, 1963 and was originally designed to serve the area as a Rehabilitation Center. In April of 1966, the Center was purchased by Friendship Homes Inc., and began to serve as a skilled nursing home. The City of McVille purchased the Center on January 1, 1998. It is a 39 bed facility offering skilled nursing care, rehabilitation, hospice, and respite care. The clinic facility in McVille was completed in 1968 and Dr. Dale Iverson was welcomed to the community as physician in 1970. Currently it is staffed by one physician and a nurse practitioner. In 1972, the name was changed from Community Hospital at McVille to Community Hospital in Nelson County and an effort was made to better serve the health needs of the entire area. In 1974, the assets of the hospital were deeded to the city of McVille in order to better enable the financing of the building project. Since that time, the debt has been retired and the hospital has been deeded back to the organization. The name was later changed to Nelson County Health System.

In 2000, the hospital was designated as a 20-bed Critical Access Hospital with a Swing Bed program. This allowed cost-based reimbursement and improved efficiencies. The McVille Medical Clinic became a Rural Health Clinic. In a time of changing health care and financing in rural areas, changes continue to be made in services provided by NCHS.

## Recreation:

McVille has a number of recreational facilities. We offer an excellent nine hole grass green municipal golf course, lighted baseball field, paved running track and football field. The McVille Dam facility located east of town offers swimming, fishing, camping, and small horsepower boating. Our newly paved, well lighted streets, top ranked schools, churches, clinic, hospital and nursing home, and a new restaurant all contribute to our better way of life. McVille maintains a local “McVille Channel” to keep you up to date on what is happening around the area. The region abounds in outdoor activities – including hunting, fishing, and snowmobiling. A 12 unit Assisted Living facility was opened in 2011.

This project is supported by the Medicare Rural Hospital Flexibility Grant Program at the Center for Rural Health, University of North Dakota School of Medicine & Health Sciences located in Grand Forks, North Dakota.
