

Addressing Substance Use Disorder in 2019: An Interprofessional Approach to Pain Management and Recovery *A Seven Part Series*

Part 1: Occupational Therapy's Role in Psychosocial Pain Management Interventions

January 23, 2019 • 12:00 – 1:00 pm Central

Presenter: Anne Haskins, PhD, OTR/L • **Facilitator:** Lisa Faust, MD

Register to attend: https://und.qualtrics.com/jfe/form/SV_em9QxWxOi8RBYG1

Connect online at: <https://echo.zoom.us/j/909560139>

Upon completion of this program, the learner will be able to:

1. Describe how the roles of a practitioner in his/her profession and an occupational practitioner may promote interprofessionally client health and wellness in the area of pain management
2. Identify three populations who may benefit from an occupational therapy referral
3. Describe common occupational therapy interventions used based on Cognitive-Behavioral Theory and the Ecology of Human Performance that may be useful for clients you presently serve

Who Should Attend?

All members of the healthcare team to include, but not limited to:

- Physicians, nurse practitioners, physician assistants, nurses, rehabilitation therapists, behavioral health providers, social workers, pharmacists, medication assisted treatment (MAT) prescribing providers, and prescribing providers interested in becoming MAT providers

Why Attend?

Because you will...

- Participate in case-based clinical discussions focused on the treatment of opioid use disorder.
- Gain up-to-date knowledge of opioid use disorder treatment through brief didactic presentations on topics of interest to learners
- Improve your confidence in managing patients with opioid use disorder
