## Upcoming Flex-Supported Coding Webinars *Presented by Rhonda Quast and Susan Roehl of Eide Bailly*

### Thursday, 8/31/17 3–4pm CST

Operationalizing Hierarchical Condition Categories: How to implement and be successful in your organization.

With increased movement to value based reimbursement across the market, the ability to accurately report patients' complex needs to account for their resource and cost utilization is becoming increasingly important. Multiple Medicare programs utilize Hierarchical Condition Category coding (HCC) as a means of communication of a patient's diagnosis history, current health status, and projected resource utilization. A lack of understanding of HCC and how their resulting Risk Adjusted Factor (RAF) scores are used to provide reimbursement to organizations, leaves you at risk of causing an unintentional negative impact to your organization's financial health.

#### **In this session we will address the following objectives:**

- Provide general understanding of Hierarchical Condition Categories (HCC), including the impact they can have on your organizations financial health
- Assess common challenges encountered in organizations as they implement workflows to support HCC scoring
- Provide feedback on next steps for your organization to be prepared and successful in HCC scoring

**To Register:** [attendeegotowebinar.com/register/7742047684316984578](http://attendeegotowebinar.com/register/7742047684316984578)

*After registering, you will receive a confirmation email containing information about how to join the webinar. Be sure to save the confirmation email, it will provide you with the link to join the webinar!*

**Prior to participating in this webinar, participants should test internet connection and audio connection at:**

[support.citrixonline.com/en\\_US/Webinar/help\\_files/G2W060001?title=Test+your+Connection%2C+Audio+or+Webcam](http://support.citrixonline.com/en_US/Webinar/help_files/G2W060001?title=Test+your+Connection%2C+Audio+or+Webcam)

#### **Please note webinar audio options -**

1. Participants accessing webinar audio online (\*Recommended method):
  - o May use built-in computer microphone and speakers for audio interaction. Use this link to test your computer microphone and speaker in advance: [support.citrixonline.com/en\\_US/webinar/help\\_files/G2W050042](http://support.citrixonline.com/en_US/webinar/help_files/G2W050042)
2. Participants may interact by dialing in through telephone after webinar has been joined. Stay connected to webinar online. (Use only if computer audio is unavailable.)
3. Participants unable to access the webinar online can join using telephone only. (Not recommended.) Telephone-only connections remain in listen-only mode for the duration of the webinar session; there is no option for interaction by voice with this option. Telephone number provided upon webinar registration.

**Webinar is free and open to all ND CAH staff. Flex has applied for and received AAPC CEU approval for one credit for live participation in each of the one hour webinars. LTC credits and AHIMA will also be available for those that participate live.**
