

*“We look forward to many more years of providing quality healthcare to our community and the surrounding areas and are thankful for the community support we have received to be able to build a state of the art new clinic in Tioga.”*  
**Randall K. Pederson, TMC President/CEO**

## Economic Impact

Strong healthcare systems help attract and maintain business and industry growth. Tioga Medical Center (TMC) creates jobs throughout Williams County, as well as contributes to the economy. Our employees support the local economy and our presence brings in dollars to area businesses.

Tioga Medical Center consists of a 25-bed hospital, a 30-bed long term care facility, three clinics (Tioga, Ray, and Powers Lake), and a 22-apartment independent living facility in Tioga.

Tioga Medical Center contributes to the health and wellness of local residents as well as the overall economic strength of Williams County. We employ local residents. The hospital and its employees spend money in Williams County to generate a secondary impact. If the hospital increases or decreases in size, the medical health and economic health of Williams County is affected. For every three jobs in the hospital, one more job is created in other businesses in Williams County. Additionally, construction projects of TMC contribute to the local economy through job creation and providing income to employees.

### Tioga Medical Center Provides Jobs
