

## Connecting Public Health Professionals

At Champ Software, we're committed to providing the technology, healthcare expertise, and creative ideas to help public health agencies achieve their objectives.

Over 30 years ago, we built Nightingale Notes to serve the unique needs of public health. Since then, more than 145 community health agencies have trusted it to track, report, and share vital information with their populations.

### SUPPORT AS UNIQUE AS YOUR AGENCY

#### NIGHTINGALE NOTES A Solid Foundation

Effective workflow management is critical to the delivery of exceptional care. Nightingale Notes provides the infrastructure you need to efficiently run your agency and serve the individuals and families in your community.

- **A cloud-based platform** for secure access to up-to-date information.
- **Seamless integration** with statewide networks and billing systems to streamline data exchange.
- **A flexible, configurable structure** designed to grow with you as your needs change or your programs expand.
- **Prompt, reliable technical support** and access to a helpful community of users for knowledge sharing.

And our technology experts stand by to help you implement and adapt it to the way you work to help you maximize your productivity.

#### Efficiency

Easily track care delivery, outcomes, billing, and more at the individual, family, or community level, without having to customize your system, pay extra or use time-consuming workarounds.

#### Data-driven Decision-making

Quickly and easily demonstrate results to both clinical and non-clinical stakeholders, using reports and dashboards designed specifically for the needs of public health agencies.

#### Improved Care

Focus on facilitating direct services to clients and communities—not paperwork—with enhanced healthcare coordination that streamlines administrative tasks.

Join the Champ Community. Working together, we can meet the challenge of improving population health.

# CHAMP

Champ Software is a pioneering developer of electronic health record (EHR) technology that's designed specifically for public health practitioners, administrators and stakeholders. Every day, more than 145 community health agencies around the country trust our solution to track, report and share the information that's vital to their populations.
