

Community-Based Behavioral Health Project Webinars

Three live Community-Based Behavioral Health Project webinars provide an opportunity to learn about supporting adults with varying needs, explore practical strategies that can be applied in in-home care settings, and access valuable resources. Each training is conducted online via Zoom, allowing participants to join from any location.

All webinars will be recorded and made available for later viewing. Each webinar focuses on a different aging adult health topic, so participants are welcome to register for one, two, or all three sessions based on their interests and learning goals.

Seeing Beyond the Symptoms: Practical Tools for Supporting Adults with Disabilities and Behavioral Health Needs

This webinar will provide evidence-informed strategies, best practices, and practical tips to help staff recognize when behaviors may be related to underlying mental health or addiction diagnoses, and respond in ways that are supportive, trauma-informed, and within their scope of practice. This webinar is presented by Monica Kramer McConkey, who has over 30 years of experience in the behavioral health field as a counselor, program supervisor, and administrator.

Mental Health Providers Working with Adults with Developmental Disabilities

This educational training is designed for mental health providers and other professionals who support adults with developmental disabilities. Participants will have the opportunity to learn more about the mental health needs and considerations of adults with developmental disabilities. The training is also relevant for professionals working with adult and aging populations in healthcare, behavioral health, social services, and community-based settings. This webinar is presented by Julie Erickson.
