

How do you decide what you want to be when you "Grow Up?"

Why health care?

- Finding people to work in health care is a challenge in many parts of the U.S. and the demand for health care workers is expected to increase greatly - especially as the "baby boomer" generation starts to retire.
- With tough economic times all around us, health care is one field projected to be in demand - making it easier to find quality, fulfilling jobs.

What are my options?

- Find out more about different health care careers by visiting ruralhealth.und.edu/topics/workforce/student.php
