*There are currently 95 practicing physicians in North Dakota who did not graduate from a residency in the US. The number of North Dakota residency graduates practicing out of the US is unknown.*
Where are practicing North Dakota physicians more likely to have completed residency than where North Dakota residents currently practice (more coming in than going out)?

- Other Southern states (AL, AR, DE, DC, FL, GA, KY, LA, MD, MS, NC, OK, SC, TN, VA, and WV) (10% vs. 5%)
- Other Midwestern states (KS, NE, SD, MO, and IA) (8% vs. 6%)
- Other Northeastern states (CT, ME, MA, NH, NJ, PA, RI, and VT) (6% vs. 1%)
- Wisconsin (5% vs. 3%)
- Michigan (7% vs. 1%)
- New York (6% vs. 1%)
- Texas (4% vs. 2%)
- Iowa (3% vs. 2%)
- Ohio (4% vs. 1%)
- Illinois (3% vs. 1%)

Where are practicing physicians who did residencies in North Dakota more likely to currently practice than where North Dakota practicing physicians completed residency (more going out than coming in)?

- North Dakota (40% vs. 22%)
- Minnesota (18% vs. 13%)
- Other Western states (AK, AZ, CO, HI, ID, MT, NV, NM, OR, UT, WA, WY) (14% vs. 5%)
- California (5% vs. 4%)

Conclusions

- The balance of migration into and out of North Dakota regarding residency graduation state varies widely by state. It can be thought of as the state level balance of trade in training and practice destination.
- The market for physicians is a national one. Medical school graduates disperse widely across the nation and are strongly influenced by such factors as the location of their residency training, specialty choice, opportunities, home origins and their spouse origins where applicable. The small and/or more specialized the medical specialty, the more nationwide is their specialty market.
- The largest number of North Dakota residents practicing out of state is in Minnesota (143).

Data

The physician data is from the 2013 American Medical Association physician master file.
