Where did North Dakota Physicians Complete their Residency and Where Have North Dakota Residency Graduates Gone?

This fact sheet is Number 20 in a series of analyses regarding physicians in North Dakota. It was developed using 2013 data from the American Medical Association physician master file. This document is an updated version of Fact Sheet Number 8 in this series.

Currently, 1,453 direct patient care physicians practice in North Dakota.

- 22% (315) graduated from North Dakota
- 13% (188) graduated from Minnesota
- 10% (142) graduated from Southern states
- 26% (381) graduated from Midwestern states
- 5% (71) graduated from Western states
- 6% (85) graduated from Northeastern states
- 4% (52) graduated from California

Currently, 778 residency graduates from North Dakota practice in direct patient care.

- 40% (315) practice in North Dakota
- 18% (143) practice in Minnesota
- 5% (42) practice in Southern states
- 9% (73) practice in Midwestern states
- 14% (106) practice in Western states
- 1% (10) practice in Northeastern states
- 5% (42) practice in California

*There are currently 95 practicing physicians in North Dakota who did not graduate from a residency in the US. The number of North Dakota residency graduates practicing out of the US is unknown.*
Where are practicing North Dakotan physicians more likely to have completed residency than where North Dakotan residents currently practice (more coming in than going out)?

- Other Southern states (Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Virginia, and West Virginia) (10% vs. 5%)
- Other Midwestern states (Kansas, Nebraska, South Dakota, Missouri, and Indiana) (8% vs. 6%)
- Other Northeastern states (Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, Pennsylvania, Rhode Island, and Vermont) (6% vs. 1%)
- Wisconsin (5% vs. 3%)
- Michigan (7% vs. 1%)
- New York (6% vs. 1%)
- Texas (4% vs. 2%)
- Iowa (3% vs. 2%)
- Ohio (4% vs. 1%)
- Illinois (3% vs. 1%)

Where are practicing physicians who did residencies in North Dakota more likely to currently practice than where North Dakota practicing physicians completed residency (more going out than coming in)?

- North Dakota (40% vs. 22%)
- Minnesota (18% vs. 13%)
- Other Western states (Alaska, Arizona, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming) (14% vs. 5%)
- California (5% vs. 4%)

Conclusions

- The balance of migration into and out of North Dakota regarding residency graduation state varies widely by state. It can be thought of as the state level balance of trade in training and practice destination.
- The market for physicians is a national one. Medical school graduates disperse widely across the nation and are strongly influenced by such factors as the location of their residency training, specialty choice, opportunities, home origins and their spouse’s origins, where applicable. The smaller and/or more specialized the medical specialty, the more nationwide their specialty market.
- The largest number of North Dakota residents practicing out of state is in Minnesota (143).

Data

The physician data is from the 2013 American Medical Association physician master file.
