CHI Lisbon Health is a not-for-profit, 25-bed Critical Access Hospital, sponsored by Catholic Health Initiatives, providing selected health care services. As a provider of community-based, family-oriented healthcare, CHI Lisbon Health believes it can best maintain this level of service through a customer focus, where we continually strive to understand and exceed the expectations of our customers. This focus is enabled through effective communication systems, staff education, team building, process improvement, work redesign and an empowered work force.

Emergency care is always available in our Level V Trauma Emergency Department 24 hours per day–seven days per week. Registered Nurses are on site at all times. Physicians, along with other support staff, are on site or on call to meet emergency needs.

Core Values

- **Reverence** - Respecting diverse viewpoints and working together to bring out the best in everyone.

North Dakota Critical Access Hospitals

History

CHI Lisbon Health originally known as Community Memorial Hospital opened its doors on February 1, 1952. Lutheran Hospitals & Homes Society of Fargo worked on this project with the local Community Memorial Hospital Association and assumed operations of the hospital.

In 1967 an addition was added to the northeast portion of the hospital which became a 20 bed nursing home wing. Because increased space was needed, a hospital wing was added to the south of the existing structure in 1976. The previous hospital wing was converted to 25 nursing home beds.

In 1992, Community Memorial Hospital and Nursing Home celebrated 40 years of dedicated service to the sick. By 1996 a remodeling project had been completed and a clinic was moved into the facility. At this time the facility’s name changed to Lisbon Medical Center.

CHI Lisbon Health changed to Critical Access Hospital status effective January 1, 2001. The facility was acquired by Catholic Health Initiatives on October 1, 2002 and changed their name to Lisbon Area Health Services.

Many specialized services have been added over the past years for the benefits of the patients. CHI Lisbon Health is served by providers from Family Medical Clinic, Essentia Health, and CHI Lisbon Health Clinic.

Recreation

Lisbon is located in southeastern North Dakota, 70 miles from Fargo, the state’s largest city. Lisbon is primarily an agricultural community; however, the processing and manufacturing of farm products in and around Lisbon employ a significant number of residents. The educational system provides services for K-12, special education classes, college preparatory programs, vocational education and computer literacy classes. Within easy driving distance, Fort Ransom State Park provides camping and skiing, while Dead Colt Creek Lake provides boating and other water recreation. Little Yellowstone Park has hiking and camping available and the Sheyenne Valley Grasslands provides an opportunity to experience upland prairie in its virgin state.
